

Innovative Business Law Solutions

Patrick Deleau, Chairman & CEO

Legal Suite

CONTROL YOUR LEGAL BUSINESS

The idea of a tool which would automate the management of legal business files and facilitate navigation of projects, received a warm reception from the legal business community. LEGAL SUITE knew they had found a market in dire need of development particularly in the context of globalization, legalization and the ever increasing speed at which information needs to be exchanged.

Legal Suite's strength stems from the fact that it responds to the needs of its users, who as a result, see an increase in proficiency and productivity. The Legal Suite solution is made of several modules all intended for managing each of the major legal areas of business: counseling, contracts, litigation, corporate secretary, delegation of power, intellectual property, real estate, insurance, legal reporting and sustainable development.

Each Legal Suite module, whether used on its own or combined, provides its users with a tool whose sole purpose is devoted to legal security and productivity. This is an area in which classic bureaucratic software has unfortunately become obsolete.

Every legal professional should have an IT system devoted entirely to his/her job whether working within the Canadian (Civil law, Common law), International or foreign legal systems.

« The strength of our solution comes from its capacity to adapt to the needs of our clients »

SYNERGY, PROFITABILITY AND HUMAN VALUE

As a testament to its success, Legal Suite was awarded with a trophy for innovation in the "Web Application and E-business" category in France; and received the prestigious "Legal IT Award" in England, also receiving the title of "Innovative New Business". Legal Suite remains committed to innovation devoting more than 20% of its operations to research and development, a figure which has grown by an average of 50% per year.

Legal Suite provides solutions to over 12 000 users worldwide and over 200 clients from the private and public sectors. After its success in France and Canada, Legal Suite has started projects to expand into the Belgium and Spanish markets.
